

District Councillor Report

Please accept my apologies for not being able to attend the meeting due to ongoing mobility issues.

I have recently raised concerns regarding North Norfolk District Council's approach to climate-related matters, including the potential for retrofitting the refuse fleet to operate on alternative fuels such as HVO. I was advised that there is currently no funding available for this work.

I have also regularly highlighted over a number of years the requirement for the introduction of food waste collection services, which is now a mandatory requirement. This service is now being implemented by the authority.

Finally, I would encourage residents to remember the importance of participating in the upcoming elections in May.

Kind regards,

Cllr Mancini-Boyle
